brief introduction of business
Expert of Pet Leashes, Collars and Harnesses

Your Competitors' Ignorance is Your Chance

"Leashes and collars are just simple belts, basically no difference buying from one or another supplier." When your competitors are thinking this, it's your chance to surpass them.

The pet leads, collars and harnesses have the largest value than other pet accessories, it's a category with great potential, should not be overlooked by any distributors in pet industry. Explore this market with us

Why Adding LCH to Your Product Line?

1. The biggest category of pet accessories, LCH are necessary for every pet. Demands more than pet clothes, shoes etc.

2. Higher value/volume rate than toys, beds, bowls etc., generate more sales for your business.

3. New functions, designs, styles sensitive, consumed more frequently than pet grooming, pet feeding products.

FULLY CUSTOMIZED PET PRODUCTS FOR YOUR MARKET

LOGO & Labels

Private labels and logos is a big feature of custom design and production. There are various options: PVC logos, woven labels, laser engraved logos etc. Available in any sizes and colors. We can create the label design for you with your logo artwork.

Webbing

As the main material of leashes and collars, the color, width, thickness and texture of webbing can be customized. Printed satin ribbons can be stitched on to create colorful patterns. We also silk screen print or heattransfer patterns directly on both sides of belt.

Fabric

A wide selection of fabrics are used on no-pull harnesses: oxford, mesh, neoprene, flyknit etc., They come with different thickness and colors, can be printed with patterns. The use of fabrics depends on the type, structure and usage of the harnesses.

Hardware

Hardware include hooks, D-rings and even sliders, buckles. Various styles can be selected and they are available in different finishing: nickel plated, chromed, pearl finish, gun metal, electrophoresis black, copper finish etc.

Plastic Accessories

Plastic parts include buckles, sliders, belt loops. There are buckles in flat design, with square frame or with safety lock. They can be made in any colors to match the webbing color or with built-in LED light.

Product Packaging

Packaging is the important media to show the product features and brand. The leashes, collars and harnesses can be packed by plastic hangers with color labels and barcode stickers, paper cardboard hangers or color boxes. You can choose the best solution with your design for your products.

Reasons Working with Us

Stand Out from Competition

We are not like other factories who only do OEM designs. We own strong research and designing capability, your business will be benefited by our continous great new products released which helps your sales and profit grow.

Already Worked with Customers in All Sizes

We understand that small entrepreneurs may need a little extra time and a helping hand to fully explore their options. Jinwen Pet has experienced success in previous cases, which is truly inspiring and shows what you can achieve for your products, brand and products.

We Take Care of Your Business

When facing complaints, business losses, we work with clients in honest manners to solve the issues. We take the liabilities to offer discounts, compensations etc. so they can sleep well at night. That is why most of customers are long term because their business grow working with us.

Customer Reviews

With our goal of complaint rate and defect rate under 1%, we establish harmonious partnership with our clients. View our customer relationship philosophy here.

CONTACT

Research & Design

New products highly accepted by pet parents are continously created by our research & design team.

Home > Services > Research & Design

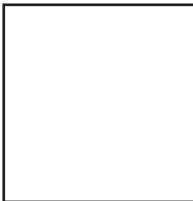

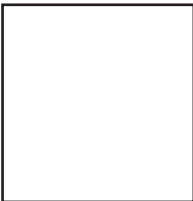

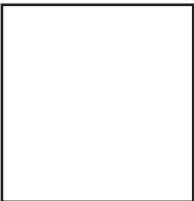

Standing in the Front Line of Trends

Inspirations of new product development & design come from anywhere, a painting, a magazine etc, combining the deep knowlege and experiences in the pet industry, our engineers and designers always create impressive new products that delights the market.

Research and Development

New Materials

We keep watching on the new material innovations on various indudustries like garments, shoes, securities etc and apply to collars, leashes and harnesses products

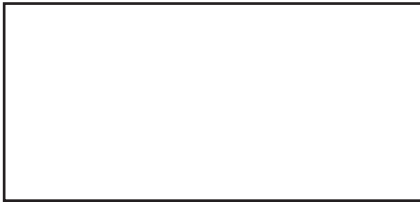

Sustainability - Go Green

Recyclable and degradable materials are getting more popular. Our new soybean fibre webbing are into the market and recognized by customers.

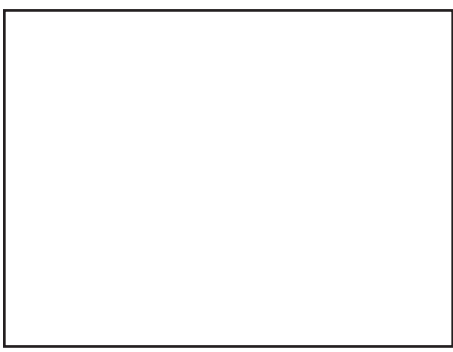

New Structure Innovation

Collars and harnesses keeps evolving, we are innovating on the designs, shapes and structure to make them more comfortable and safer to pets.

Elements for Design and Innovation

Materials

A harness is composed of a number of materials: belt, fabric, piping, hardware and plastic parts. The selections of these elements makes the style and quality of the product.

Patterns

Patterns appears on webbing and fabric, there are different techniques to put the patterns on: jacqued, sublimation, silk screen printing and more.

Functions

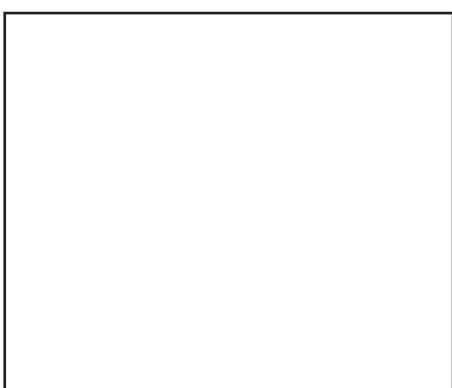

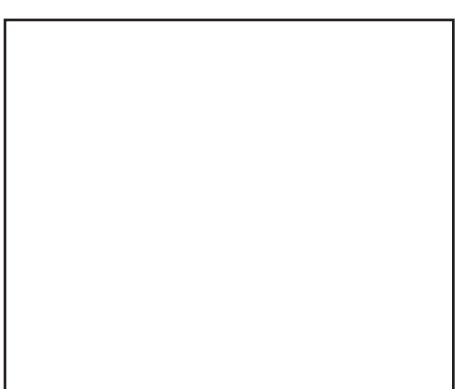

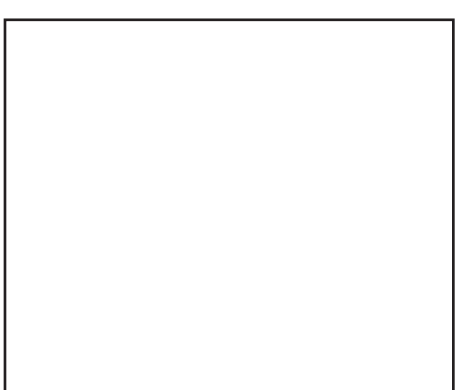

Incorporating new functions to leads, collars and harnesses can be part of design and innovation. Adding pocket or buckle on a normal leash can create an exciting new product.

How Our Customers Benefit From Our New Designs & Innovations?

- 1. More customer attentions.
- 2. Receive new products faster.
- 3. General more sales.

- 4. Better profits with new products.
- 5. Gain higher market share.
- 6. More likes on social media.

Contents of Quality Control

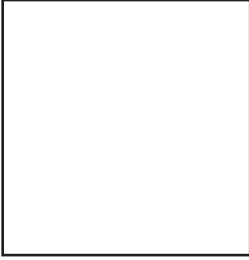

Colors

Color variations happens when materials coming from different suppliers and from different production batches. Monitoring colors is an important part of quality control.

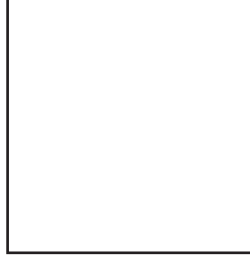

Dimensions

The dimensions include adjustment ranges of collars and harnesses, widths, thicknesses of webbing, sizes of materials etc. All the detailed are inspected during the processes of productions.

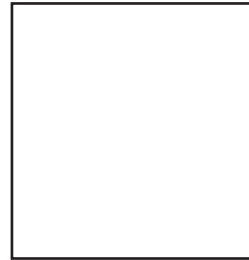

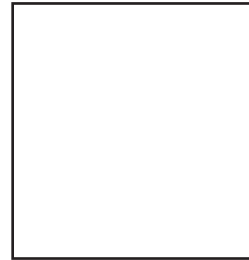

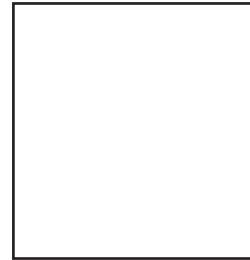

Hardware & Finishing

Hooks, D-rings, O-rings, sliders and other parts are normally coated with various finishing, we check the treatment defects, weights, sizes. The spray & salt tests and strength pull tests are carried out.

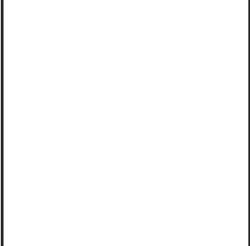

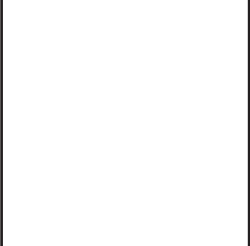

Positions

Logos, labels are always on harnesses, collars and leashes. As an important element, we pay much attention to make sure they are placed on the right positions, right places in correct directions, angles.

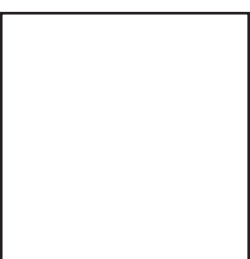

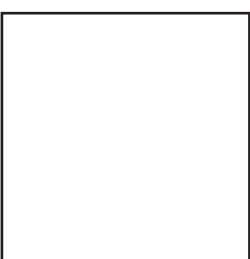

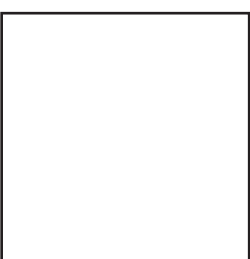

Stitching

A lot of stitching and sewing works are done on leads, collars and harnesses, the quality of stitching impact the quality of product. Colors of stitching lines, stitching distances, details are inspected carefully in manufacturing.

Packaging

Our QC team inspect colors, texts, numbers and specification datas on all the packaging materials: printed cards, color labels, barcode stickers, instruction manuals, color boxes etc. Assembly methods, pieces per inner bags and cartons, shipping marks are all monitored.

Quality Can be Seen Throughout Production

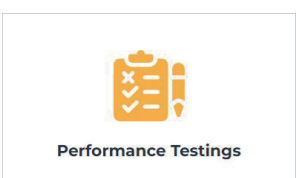

By maintaining strict quality control standards from receiving materials to completion and packaging, we ensure the consistent quality of our dog gears.

Raw Material Inspection

After-Sales Services

Replacements, Discounts, Compensations, Refunds, we take the responsibility when business goes wrong.

Home > Services > After-Sales Service

Replacements, Discounts, Compensations.

We value the long term relationships with every customer. When defects, damages happens, we take our responsibility without hesitation to offer replacements, discounts or compensations. Working with Boonpets, you always sleep well at night.

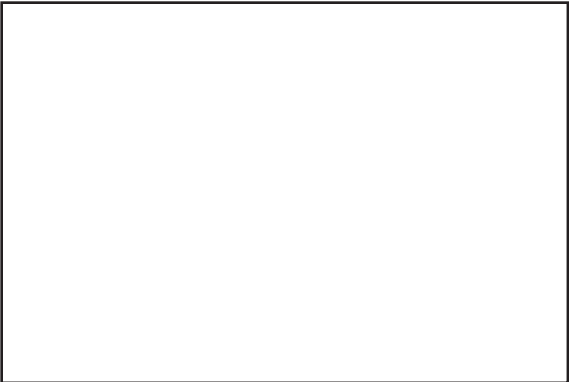

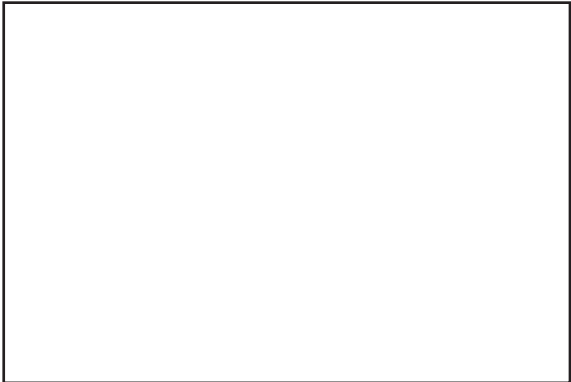

How We Deal With Defective Shipments?

It happens in international trade that goods received were found damaged, defective or in wrong sizes or colors. We take the responsibility promptly and offer re-work costs, discounts and compensations without hesitation.

Re-work Cost	Discounts	Compensations
When goods arrived are found damaged but can still be used by replacing some parts. Customers are requested to do the re-work locally. We offer replacement parts free of charge and bear the cost of re-working. It is usually the damage of packaging cards, boxes etc.	When goods received are found with slight defects and customer thinks they can still be sold at cheaper prices, in this situation, we normally discuss with customers and offer an attractive discount so they can also sell to their clients at lower prices.	When products have functional defects or other major problem that is no longer suitable for selling in the market. We will directly offer compensations in such or other situations. The compensated money will be deducted from the next payment or be refunded directly.

Succeed Together with Our Customers

We aim to work with clients based on long term relationship.
